PROFESSIONAL SUMMARY

Shopify Developer with hands-on experience building and migrating production storefronts for recognizable DTC brands. Specializing in Liquid theme development, checkout extensions, Shopify Functions, and full-stack analytics setups (GTM + GA4). Proven ability to deliver complex, client-facing features on tight timelines.

SKILLS

Shopify: Liquid, Theme Development, Checkout Extensions, Shopify Functions, Metafields and Metaobjects, Custom Pixels, App Integration, Shopify React Router App Development

Frontend: ReactJS, JavaScript, HTML, CSS, Pixel-Perfect UI Implementation

Analytics: Google Tag Manager (GTM), GA4, Data Layer

Backend: Shopify UI Extensions, Shopify Functions

Tools: Git, GitHub

AI Tools: Claude Code, Antigravity and Cursor for AI Assisted Development

EXPERIENCE

Shopify Developer @ EcomExperts.io | *Sep 2024 – Present*

Responsibilities

- Shopify theme development and pixel-perfect design implementation
- Checkout extensions development and custom app/pixel integrations
- Analytics tracking setup including GTM containers and GA4 properties

Key Achievements

- **Minor League Baseball — Large-Scale Store Unification (EcomExperts.io Flagship Project):** Led key workstreams in EcomExperts.io's largest project to date — consolidating 120 individual Minor League Baseball team stores into a single unified Shopify store. Responsibilities included full customer migration across all team stores, product tags management and taxonomy restructuring to support the unified catalogue, collection creation for the merged store architecture, and theme development work to ensure a cohesive storefront experience across all teams.
- **Supergut — Headless to Native Theme Migration:** Migrated the full Supergut storefront from a headless architecture to a native Shopify theme (Base theme) in ~6 weeks, rebuilding 5+ core page types (home, collection, PDP, account, static pages). Delivered significant improvements in site speed and long-term maintainability under native Shopify structure.
- **Seeking Health — Analytics Infrastructure:** Built a complete analytics stack from scratch — created a new GTM container and GA4 property, implemented all standard Shopify events via the data layer, and integrated ConsentMo for GDPR-compliant cookie consent management.
- **Custom Discount Generation App — Shopify React Router:** Built an app for the company that consists of multiple discount generation templates. Worked in tandem with another developer to create 4 templates which are Generic, Bundle, Tiered and Free Gift discounts. Each template has dynamic conditions where merchants can add/remove conditions as well as combine them based on *AND* and *OR* gates.
- **La Canadienne — Custom Shopify React Router App:** Designed and developed a full Shopify embedded app for a footwear brand, La Canadienne. The app features a multi-product resource picker, a grid-based inventory dashboard showing stock levels per location and per variant, and an inventory transfer workflow allowing clients to redistribute stock across locations. Additionally integrated sales-by-location analytics so clients can identify high-performing locations and make data-driven transfer decisions and a full CSV export of all transfer reports for record-keeping.

EDUCATION

BS Software Engineering
Balochistan University of Information, Technology and Management Sciences (BUITMS) · 2016 – 2020
CGPA: 3.76 / 4.0
